

HERE & HUNTINGDON

H4H phases one, two, and three have cost over £980,000, and we are grateful to all of the funding bodies who have generously supported us with grants and donations.

We also had an unexpected expense after Phase 3 had been completed, when we were required to install a water attenuation tank under our carpark to control the flow of rainwater coming off the church roof. We are particularly grateful to The Amey Community Fund who provided the additional grant which enabled us to complete this work.
